

Participant Consent Form – Usability Study

Design of a Digital Coffee Machine Interface

Dimitri Laumann

M.Sc. Computer Science, University of Siegen

dimitri.laumann@student.uni-siegen.de

Study Information

You are invited to participate in a usability study evaluating a digital interface for controlling a coffee machine. The goal of this study is to understand how users interact with the interface and identify potential improvements.

If you agree to participate, you will be asked to use the coffee machine interface to prepare one coffee of your choice. During the session, the researcher may observe how you interact with the system and take notes about usability.

The session will take approximately **20-30 minutes**.

Data Collected

During the study the following information may be collected:

- whether the task was completed successfully
- time required to complete the task
- observations about interaction with the interface
- responses to a short questionnaire

Participants will be identified only by a participant ID (e.g., P01).

No personally identifiable information will be included in the thesis.

All collected data will be used only for academic research as part of the researcher's master's thesis.

Confidentiality

All collected information will be treated confidentially and stored securely.

Results will be reported only in anonymized and aggregated form.

The data will not be shared with third parties.

Consent

By signing below, you confirm that:

- you have read and understood the information above
- you have had the opportunity to ask questions
- you voluntarily agree to participate in this study

Participant ID: _____

Name (optional): _____

Age: ☐ <20 ☐ 20 ☐ 25 ☐ 30 ☐ 35 ☐ 40 ☐ 45 ☐ 50 ☐ 55 ☐ 60 ☐ >60

Signature: _____
